Technical Skills

- **Mobile Development:** Flutter, Dart, Android Configuration, Firebase (FCM, Authentication, Firestore)
- **Frontend Development:** React, JavaScript, HTML5, CSS3
- **Backend & API Integration:** RESTful APIs, JSON Parsing, HTTP Networking
- **State Management & Structure:** Provider, Modular Architecture, Component-Driven UI
- **Databases:** MySQL, SQLite
- **Development Tools:** Git, GitLab, GitHub, Postman, Android Studio, VS Code

Work Experience

Chadura Tech Musiri / India
Mobile Application Developer *Apr 2026 – Present*

- Engineer production Flutter applications, managing full feature lifecycles from UI design to backend REST API consumption.
- Integrate secure RESTful APIs, JWT token-based authentication workflows, and persistent session storage.
- Collaborate with backend developers and project leads using Git and GitLab for branch management, code reviews, and issue resolution.
- Resolve platform-specific bugs and refactor UI components into modular, reusable widgets for consistent rendering across screen sizes.

Coreverse Remote / On-site
Flutter Developer Intern *Dec 2024 – Feb 2025*

- Built responsive mobile UI components in Flutter for the *DOCORE* SaaS school management platform.
- Assisted in implementing student attendance and administrative record views backed by Firebase.

Key Projects

BillCostro Mobile | *Mobile Application Developer* *May 2026 – Jul 2026*
Technologies: Flutter, Dart, Provider, Django REST, Firebase (FCM), SharedPreferences

- Built enterprise Flutter application for operational services including asset workflows, leave management, and ticketing.
- Integrated Django REST APIs via HTTP using Bearer/JWT token authentication and session persistence with SharedPreferences.
- Architected responsive screens and state management using Provider across multi-step requests and complex form validations.
- Implemented real-time push notifications using Firebase Cloud Messaging (FCM) along with secure in-app document upload and access.

HRMS & Payroll Mobile Application | *Mobile Application Developer* *Jul 2026 – Sep 2026*
Technologies: Flutter, Dart, Provider, REST API, Location Services, PDF Viewer

- Implemented location-based geo-fenced attendance tracking allowing employees to clock in and out accurately.
- Built leave request submission and tracking modules with dynamic status updates via backend APIs.
- Integrated secure payslip and document management, including in-app PDF viewing and file storage workflows.
- Managed authentication lifecycles with token auto-refresh and protected route navigation.

Play Circuit | *Mobile Application Developer* *Sep 2026 – Oct 2026*
Technologies: Flutter, Dart, REST API, State Management, Custom UI

- Developed sports venue discovery and court availability booking interfaces with interactive filtering.
- Handled end-to-end user authentication, venue detail rendering, and slot reservation API integration.
- Optimized widget tree rebuilding and modularized custom UI components for smooth transitions and performance.

Education

K S Rangasamy College of Technology *2021 – 2025*
Bachelor of Technology in Information Technology *Tiruchengode, India*

Sowdambikka Matric Higher Secondary School *2020 – 2021*
Higher Secondary Certificate (HSC) *Trichy, India*
